EXPERIENCE

GoCater (Catering Ordering Platform)

Binus Entrepreneurship Program | 2024 -2025

- Designed the UX/UI for a catering-ordering platform concept connecting SMEs with customers, and independently built the landing page using HTML, CSS, and JavaScript, deployed via GitHub Pages.
- Developed an early-stage Android app prototype (Java, Android Studio) implementing core screen navigation between key views.

UlaKatering (Catering Review & Promotion Platform) - Thesis Project

Mar 2025 - Sept 2025

- Led UI/UX research and design process end-to-end for a catering discovery and review platform, using a Human-Centered Design approach; achieved a System Usability Scale (SUS) score of 75.2.
- Built the frontend interface with Vue.js based on the design system, and supported backend/database integration (CodeIgniter, PostgreSQL) using AI-assisted development.
- 75% of participating SMEs reported improved promotional reach; 71.4% of users found catering services easier to discover.

PROJECTS

WorkFitAI (AI-Powered Fitness Platform)

- Designed wireframes and prototypes for a mobile fitness app concept featuring AI-powered personalized workout recommendations.

Personal Portfolio Website (Portfolio)

- Designed and built a personal portfolio site with React and Tailwind CSS, focused on layout, responsiveness, and visual presentation of case studies.
- Explored basic REST API integration with a Laravel backend using AI-assisted development as a learning exercise.

EDUCATION

Bina Nusantara University

2021 - 2025

Computer Science | IPK: 3.28/4.00
